# A CHANGING ARKANSAS: AS REFLECTED BY POPULATION AND RELATED DATA, 1970-1980

Prepared By

Demographic Research Division
Center for Information Services
Research and Public Service
University of Arkansas at Little Rock

September, 1985

# FOREWORD

This publication has been prepared as a basic data manual on Arkansas' population, social, and economic statistics for the decade of the nineteen seventies. The initial study, published in 1973, concentrated on the nineteen sixties. Statistics are presented at the county level and for the State's eight planning and development districts. Comparative national statistics are presented when available.

Since the primary objective was to construct as comprehensive a statistical reference as possible, the narrative is limited to analytical comments on the most significant aspects of the data as presented in the tables and maps. Thus, an interpretation of the data in respect to underlying causes and implications was not undertaken even though it is recognized that these factors must be considered in numerous economic and social-services planning processes.

A special thanks is extended to Arkansas Rehabilitation Services for their interest in this project and for their production support.

# I. Introduction

This presentation and analysis of the changes occurring within Arkansas from 1970 to 1980 as reflected by selected population, social, economic and related data is the second study on this subject undertaken by this organization. The initial study covered the period from 1960 to 1970.

The basic data source for the study was the Census Bureau's 1970 and 1980 Censuses of Population and Housing. In addition to the census data, statistics from the Arkansas Departments of Health and Human Services and the U.S. Social Security Administration are secondary sources.

The narrative and graphical summary of the tabular data is consistent with the order in the Appendix. It is divided into the following seven sections:

- II. **Population Distribution**
- III. **Personal and Household Characteristics**
- IV. **Labor Force and Economic Characteristics**
- V. **Income Status**
- VI. **Disability, Health Care Facilities, and Public Assistance**
- VII. **Housing Characteristics**
- VIII. **Vital Statistics**

As to geographic area coverage, the tabular presentation contains State data at the county and planning and development district levels. (See Figure 1.)

# II. Population Distribution

## Total Population

Arkansas' 1980 population count was 2,286,435, reflecting an absolute growth during the 1970's of 363,140 or a percent change of 18.9. (See Table 1.) The corresponding relative increase experienced by the United States for this same period was 11.5 percent.

Arkansas' relative increase in population during the 1960's was 7.7 percent compared to 13.3 percent for the United States. The State's growth over the past two decades represents a significant reversal of the 8.4 percent population decline experienced between 1940 and 1960.

As indicated in Table 2, the relative growth during the 1970's of five of the State's eight planning and development districts exceeded the State average of 18.9 percent. The districts and their growth rates were Northwest, 40.6 percent; White River, 32.0 percent; Western, 25.3 percent; West Central, 25.1 percent; and Central, 22.5 percent. The 1980 population counts of the districts ranged from Central's 498,676 to White River's 188,488.

As shown in Figure 2, 67 of Arkansas' 75 counties gained population during the 1970's. By contrast, 46 counties experienced population increases in the 1960's, while only six counties recorded increases in the 1950's. The eight counties decreasing in population in the 1970's and their relative losses were Lee, -17.7 percent; Phillips, -13.2 percent; Monroe, -10.3 percent; Mississippi, -4.1 percent; Woodruff, -3.0 percent; Chicot, -2 percent; Prairie, -1.1 percent; and Ouachita, -1.1 percent.

## Population Per Square Mile

The 1980 counts showed that there were 43.9 persons per square mile in Arkansas compared to 64.0 persons for the United States. Four of Arkansas' planning and development districts and 22 counties had population densities that exceeded the State average. Pulaski County had the highest density—444.1 persons per square mile—and Newton County had the lowest density—9.4 persons per square mile.

## Urban and Rural Population

Arkansas' urban population increased by 22.7 percent between 1970 and 1980, compared to a 12.2 percent increase for the United States.[1] For the first time in the State's history, its 1980 urban population count of 1,179,556 accounted for a greater proportion of its total population (51.6 percent) than did the rural count of 1,106,879. For the United States, 74.0 percent of its population was classified as urban.

In four of Arkansas' eight planning and development districts, the urban population proportions exceeded the State average. These districts and their urban shares were Central, 72.0 percent; Western, 58.2 percent; Southeast, 54.6 percent; and East, 51.7 percent.

As indicated in Figure 4, 15 of the State's 75 counties had urban shares greater than the State average; 46 counties had urban proportions ranging from 2.7 percent to 51.3 percent; and the remaining 14 counties had no urban population. The urban shares of only two counties exceeded the average for the United States. These counties were Pulaski with 87.2 percent urban population and Sebastian with 82.9 percent.

Arkansas' 1980 rural population count was 1,106,879, reflecting an increase of 144,528 (15.0 percent) from 1970 to 1980.[2] This indicates the reversal of a past trend. Between 1960 and 1970, the rural population declined by 58,539 (5.7 percent), and between 1950 and 1960, it decreased by 257,951 (20.2 percent).

Of the districts, only the East sustained a rural population loss of 14,906 (7.4 percent) in the 1970's. In the other seven districts, relative rural population increases ranged from 2.7 percent in the Southeast to 35.9 percent in the Northwest.

Regarding the relative distribution of the State's rural population, the East has the largest proportion with 16.9 percent of the State total. The Western District has the smallest proportion of 7.3 percent.

Of the State's rural population, 90.3 percent were nonfarm residents and 9.7 percent were farm residents. (See Table 5.) In 1970, the corresponding proportions were 81.9 percent nonfarm and 18.1 percent farm residents.

In four districts, the rural farm population proportions exceeded the State average of 9.7 percent. In the Northwest District, the farm residents numbering 24,133 represented 14.4 percent of the rural population; in the East District, the numbers were 23,472 or 12.5 percent; in the Western District, 9,527 or 11.8 percent; and in the White River District, 15,200 or 10.9 percent. As shown on the next page, these four districts accounted for 67.2 percent of the State's rural farm population.

1980 RURAL FARM POPULATION

| Area | Number | Percent Distribution |
|---|---|---|
| ARKANSAS | 107,648 | 100.0 |
| Northwest | 24,133 | 22.4 |
| White River | 15,200 | 14.1 |
| Central | 7,972 | 7.4 |
| Southeast | 9,288 | 8.6 |
| Southwest | 7,338 | 6.8 |
| East | 23,472 | 21.8 |
| Western | 9,527 | 8.9 |
| West Central | 10,718 | 10.0 |

## Net Migration

Estimates of net migration[3] are contained in Tables 6 and 7, and the data is graphically presented in Figures 5 and 6.

During the 1970-1980 intercensal interval, there was an estimated net inmigration of 231,376 persons into Arkansas, reflecting a migration rate of 11.0 percent. A review of the data by color shows an estimated net inmovement of 239,751 whites (13.9 percent) and a net outmovement of 8,375 nonwhites (2.2 percent). By contrast, during the 1960-1970 interval Arkansas experienced an estimated net outmigration of 51,152 persons. This is a 2.8 percent migration rate, reflecting an inmigration of 47,651 whites (3.2 percent) and an outmigration of 98,803 nonwhites (26.4 percent). In the 1950's, there was an estimated net outmigration of 433,000 persons or a rate of 23.4 percent.

During the 1970's only the East District experienced a net outmigration, 14,966 persons (3.9 percent). In the other seven districts, net inmigration rates ranged from 0.4 percent in the Southeast to 29.3 percent in the Northwest.

Fifty-six of the State's 75 counties experienced net inmigration; the rates ranged from 1.2 percent in Jackson County to 58.5 percent in Baxter County. For the 19 counties which experienced net outmigration, the rates ranged from 0.2 percent in Columbia County to 28.6 percent in Lee County.

Figure 6 depicts three basic patterns of migration-population change by county, for the period from 1970 to 1980. Fifty-six counties experienced both population gains and net inmigration; 11 counties had population gains but experienced net outmigration; and eight counties had both population losses and net outmigration.

## Place of Residence, 1975

As shown in Table 8, of Arkansas' 1980 count of 2,112,556 persons five years of age and over, 53.1 percent were living in the same house that they occupied in 1975; an additional 24.8 percent were residing in the same county but in a different house in 1975; 9.1 percent resided in Arkansas but in a different county in 1975; 12.4 percent resided in another state in 1975; and the remaining 0.6 percent were those who either lived abroad in 1975 or did not report their 1975 place of residence.

Four planning and development districts and 28 counties had relative 1975-1980 inmovement from other states that exceeded the State average of 12.4 percent. The inmovement rates for the counties ranged from 3.2 percent in Bradley County to 28.4 percent in Baxter County.

## Living Arrangements

Every person is classified by the Census Bureau as either a member of a household or a resident of group quarters. As shown in Table 9, 2.3 percent (51,610) of Arkansas' 1980 population resided in group quarters. For the Nation, those living in group quarters accounted for 2.5 percent of the total population.

Of the State's residents living in group quarters, 2.7 percent were inmates of mental institutions; 36.1 percent were inmates of homes for the aged; 13.5 percent were inmates of other institutions; and the remaining 47.7 percent represented all other classes of those living in group quarters.[4] For the Nation, the corresponding proportions were 4.3 percent, 24.9 percent, 14.3 percent, and 56.5 percent, respectively.

Although none of the districts have residents of group quarters which account for a significant part of their total population, there are several counties in the State with relatively large proportions of their population in group quarters. This fact should be recognized and adjustments made in those instances where the size of the group quarters population would adversely affect analysis and interpretation of the demographic and socio-economic characteristics of a county.

[a] Inmigrants are defined as those persons who were residents of another state in 1975. The percentages are based on 1980 population five years of age and over.

Source: Derived from Table 8.

# III. Personal and Household Characteristics

## Age Distribution

Population by selected age groups, by sex, in 1980 is shown in Tables 10 and 11. The 1980 median age of Arkansas' population was 30.6 years, compared to 30.0 for the United States. In 1970, the median ages for the population of the State and Nation were 29.1 and 28.1 years, respectively.

In 1980, five of the State's districts had median ages higher than the State average of 30.6 years. The districts and the median ages of residents were White River, 33.7; West Central, 33.2; Northwest, 32.4; Southwest, 32.0; and Western, 31.5. The districts with median ages below the State average were Southeast, 29.5; Central, 28.8; and East, 28.8.

There was a substantial variation in the median age within the counties, ranging from 26.1 years in Crittenden County to 46.7 years in Baxter County. (See Figure 8.)

In 1980, the median age of Arkansas' female population was 32.0 years compared to the male population's 29.2 years, a difference of 2.8 years. The same difference existed in 1970, when the median ages of females and males were 30.5 and 27.7 years, respectively.

Table 11 shows that 9.2 percent of the State's 1980 population was five years of age or under. The relative range among the districts was from 8.1 percent in the Northwest to 10.2 percent in the East. The county with the smallest number of persons aged five and under was Calhoun with 534 such persons, representing 8.8 percent of its total population. The county with the largest number of persons aged five and under was Pulaski with 33,932 or 10.0 percent of its total population.

Persons 65 years and over numbered 312,477 and accounted for 13.7 percent of Arkansas' 1980 population. In the districts, the percent of total population aged 65 years and over ranged from 10.2 in Central to 16.4 in White River. Among the counties, the range in the proportion 65 years and over was substantial: from a low of 9.1 percent in Saline County to a high of 27.3 percent in Baxter County.

Between 1970 and 1980, Arkansas' population aged 65 years and over increased by 74,717 or 31.4 percent compared to 27.3 percent for the Nation. (See Table 12.) The State's male population in this age group increased 25.1 percent (26,601), and the female population increased 36.6 percent (48,116). The total population 65 years and over increased in all counties except Lee County where it decreased by 37 persons or 1.6 percent. In the other counties the relative increase ranged from 0.8 percent in Phillips County to 115.3 percent in Baxter County.

## Population by Race

The 1980 racial distribution of Arkansas' population (Table 13) indicated that 82.7 percent of the State's population was white, 16.3 percent was black, and 1 percent was made up of other races. For the Nation, the proportions were 83.1 percent white, 11.7 percent black, and 5.2 percent other races.

In four of the State's districts, whites accounted for over 90.0 percent of the total population. These districts and their white population proportions were Northwest, 98.2 percent; White River, 94.8 percent; Western, 94.7 percent; and West Central, 91.3 percent.

In the other four districts, the black proportions of their total population exceeded the State average of 16.3 percent. These districts and their black population proportions were Southeast, 33.5 percent; Southwest, 28.6 percent; East, 22.8 percent; and Central, 19.6 percent. As shown in Figure 10, Arkansas' black population resides for the greater part in the southern and eastern areas of the State.

Between 1970 and 1980, the State's white population increased by 20.7 percent (324,407), or from 1,565,915 to 1,890,322. Its nonwhite population increased by 10.8 percent (38,733), or from 357,380 to 396,113. These numbers reflect a slight drop in the nonwhite share of the State's total population from 18.6 percent in 1970 to 17.3 percent in 1980.

Between 1960 and 1970, white population increases were recorded in all eight districts and ranged from 8.1 percent in the East to 39.0 percent in the Northwest. Absolute changes ranged from 15,536 in the southeast to 79,137 in the Northwest. Six of the State's 75 counties experienced white population losses ranging from 28 persons in Chicot County to 2,581 in Mississippi County.

The East District recorded a nonwhite population loss of 5,838 or 6 percent. All other districts experienced gains in their nonwhite population, ranging from 2 percent (1,665) in the Southeast to 254.3 percent (3,894) in the Northwest. However, the largest absolute increase in the nonwhite population occurred in the Central District: 26,524. Among the counties, 19 lost nonwhite population. The greatest loss (3,127) was recorded in Phillips County. Pulaski County experienced the largest gain in nonwhite population: 26,733.

## Population in Households

Table 15 indicates that in 1980 there were 2.74 persons per household in Arkansas, compared to 2.75 for the United States. In 1970, the figures were 3.05 for Arkansas and 3.11 for the Nation. For Arkansas' districts in 1980, the number of persons per household ranged from 2.63 in the West Central and Northwest Districts to 2.88 in the East District. Thirty-eight counties had household sizes larger than the State average. The range for these counties was from 2.75 to 3.14 persons per household.

## Households by Type of Household Head

All households are classified as either family or primary individual units.[5] In 1980, 76.6 percent of Arkansas'816,065 households consisted of family units, while the other 23.4 percent were primary individual units. (See Table 18.) For the United States, the proportion was less in the percent of households in family units (73.6) but greater in the percent of primary individual units (26.4).

Of Arkansas' 625,390 families, 84.5 percent were husband-wife families, 2.9 percent had other male heads, and 12.6 percent had female heads. The percent of families with female heads ranged from 8.2 percent in the Northwest District to 15.2 percent in the Southeast District. Males were head of the household in 37.6 percent of Arkansas' 190,675 primary household units, and females in 62.4 percent of the units.

Family household units as a percent of all households ranged from 74.8 percent in the Central District to 79.2 percent in the White River District.

## Households by Type and Presence of Own Children

Table 19 reflects a 1980 Arkansas household count of 816,706.[6] The distribution of this count by household type indicates that almost two-thirds (65.3 percent) of the households were represented by married couple families, 9.4 percent were family households headed by females with no husband present, 2.2 percent were family households headed by males with no wife present, and the remaining 23.1 percent were nonfamily households. The national household distribution pattern was similar to the State's: the percents were 60.2, 10.5, 2.6, and 26.8, respectively.

Just over a third (38.7 percent) of Arkansas' 1980 households were families in which own children were present.[7] Of these 315,904 families, 83.0 percent were married couple families, 14.6 percent were families headed by females with no husband present, and 2.4 percent were families headed by males with no wife present. The national distribution pattern for this group was essentially similar to that of the State: the percents were 80.5, 16.8, and 2.7, respectively.

## Status of Persons 65 Years of Age and Over Residing in Family and Nonfamily Households and in Group Quarters

Almost two-thirds (66.0 percent) of Arkansas' 1980 population 65 years of age and over resided in family households, 28.7 percent in nonfamily households, and the remaining 5.4 percent in group quarters. (See Table 20.) The national residence distribution was essentially the same as that of the State.

Of the reported State group quarters population of 16,788, approximately 91 percent were residents of homes for the aged. Females accounted for 69.2 percent and males for 30.8 percent of the 15,232 persons residing in these homes. This indicates that there were only 44.5 males per 100 females residing in these homes in 1980.

In evaluating the significance of the sex distribution in relation to the several categories of residential situations, it should be noted that in 1980 females accounted for 57.5 percent of the State's 312,477 persons 65 years of age and over.

Also of significance is the fact that female household heads accounted for over three-fourths (78.2 percent) of Arkansas' 1980 nonfamily household head total of 88,090.

A comparison of the relative importance of residential status as related to geographical residence within the State's Planning and Development Districts is shown in the following tabular insert. The range of relative significance within each of the three residential status categories is worth noting. The percent of the population 65 years of age and over residing in family households ranged from 62.8 in the Central District to 71.8 in the Northwest; the percent residing in nonfamily households varied from 24.1 in the Northwest to 30.6 in the Central; and the percent residing in group quarters ranged from 4.1 in the Northwest to 6.6 in the Central District.

| | Percent Distribution | | | |
|---|---|---|---|---|
| **District** | **Total 65+** Population | **In Family Households** | **In Nonfamily Households** | **In Group Quarters** |
| Northwest | 100.0 | 71.8 | 24.1 | 4.1 |
| White River | 100.0 | 69.9 | 25.7 | 4.4 |
| East | 100.0 | 65.1 | 29.7 | 5.2 |
| Western | 100.0 | 65.3 | 28.4 | 6.3 |
| West Central | 100.0 | 65.6 | 29.3 | 5.1 |
| Central | 100.0 | 62.8 | 30.6 | 6.6 |
| Southeast | 100.0 | 64.0 | 30.5 | 5.5 |
| Southwest | 100.0 | 63.9 | 30.4 | 5.7 |
| STATE OF ARKANSAS | 100.0 | 66.0 | 28.7 | 5.4 |

## Median School Years Completed

Table 21 contains data on years of school completed for the population 25 years old and over in 1980. The median school years completed by this age group were 12.2 for Arkansas compared to 12.5 for the Nation. For Arkansas, this represents a significant improvement since 1970, when the State's median school years completed were 10.5, compared to 12.1 for the Nation.

In 1980, 55.5 percent of Arkansas' population aged 25 years and over had completed high school, and 10.8 percent had completed four or more years of college. For the Nation, the corresponding proportions were 66.5 percent and 16.2 percent.

Within the districts, the median school years completed ranged from 11.1 years in the East to 12.5 years in the Central District; the percent completing high school ranged from 44.8 percent in the East to 66.8 percent in the Central District; and the percent completing four or more years of college ranged from 7.9 percent in the White River District to 16.0 percent in the Central District.

Among the counties, the median school years completed ranged from 9.2 years in Lee County to 12.6 years in Pulaski County, and the percent completing high school ranged from 31.9 percent in Lee County to 71.7 percent in Pulaski County.

# IV. Labor Force and Economic Characteristics

## Dependency Ratios

In 1980, there were 94.2 dependents per 100 workers in Arkansas, and 82.5 dependents per 100 workers in the Nation. (See Tables 22 and 23.) The dependency ratio[8] ranged from 83.2 in the State's Central District to 102.3 in the East District. As shown in Figure 12, dependency ratios in the State's counties ranged from 79.3 in Pulaski County to 129.4 in Lee County.

There were 67.7 youths per 100 workers in Arkansas, compared to 61.9 in the Nation. In the State's districts, the youth dependency ratio ranged from 61.7 in the Northwest to 76.8 in the East. The youth dependency ratio exceeded the State average in three districts. These districts were the East (76.8), the Southeast (74.0), and the Southwest (69.0).

Arkansas' 1980 old-age dependency ratio was 26.5 dependents aged 65 and over per 100 workers. The corresponding national figure was 20.6. There was a considerable variation in this ratio among the districts, ranging from 18.6 in Central to 32.3 in the White River District.

## Civilian Labor Force and Employment Status

Table 24 indicates that Arkansas' 1980 civilian employment totaled 875,733. This represents an increase of 226,036 or 34.8 percent above the 1970 employment count of 649,697. The Nation's employment count increased by 27.5 percent during the same period. By contrast, during the decade of the 1960's, the State's employment rose by 14.9 percent, compared to an 18.4 percent increase for the Nation. In 1980, the unemployed represented 6.9 percent of Arkansas' civilian labor force, compared to 6.5 percent for the Nation.

Of Arkansas' 1980 employment count of 875,733, 6.8 percent were employed in agricultural and 93.2 percent in nonagricultural industries. Employment in manufacturing accounted for 25.1 percent of the State's total employment. For the Nation, 3 percent of its civilian employment was in agricultural and 97 percent in nonagricultural industries, while manufacturing employment represented 22.4 percent of the total employment.

Arkansas' manufacturing employment increased from 169,691 in 1970 to 219,720 in 1980, reflecting a growth of 50,029 or 29.5 percent. Manufacturing employment as a share of the State's total employment increased from 20.1 percent in 1960 to 26.1 percent in 1970 but decreased slightly to 25.1 percent in 1980. In the districts, this 1980 share ranged from 18.7 percent in the Central District to 30.0 percent in the Southwest.

The following table shows the number employed in manufacturing by district of residence and the share of the State's total manufacturing employment that each represents.

**1980 MANUFACTURING EMPLOYMENT**

| Area | Number | Percent Distribution |
|---|---|---|
| ARKANSAS | 219,720 | 100.0 |
| Central | 39,930 | 18.2 |
| East | 38,981 | 17.7 |
| Northwest | 28,088 | 12.8 |
| Southwest | 27,159 | 12.4 |
| West Central | 24,099 | 11.0 |
| Western | 22,663 | 10.3 |
| Southeast | 22,179 | 10.1 |
| White River | 16,621 | 7.5 |

Manufacturing employment as a share of total resident employment ranged from 14.2 percent in Chicot County to 42.1 percent in Howard County and exceeded the State average of 25.1 percent in 54 counties.

Agricultural employment in Arkansas increased from 54,588 in 1970 to 59,212 in 1980, or by 4,624 (8.5 percent). Between 1960 and 1970, agricultural employment declined by 45,612 (45.5 percent). The relative share of agricultural employment in the State's total employment declined from 17.7 percent in 1960 to 8.4 percent in 1970 to a still lower 6.8 percent in 1980. Agricultural employment shares of total employment ranged from 3.0 percent in the Central District to 9.6 percent in the East.

The following table shows agricultural employment by district of residence and the share of the State's total agricultural employment that each represents.

**1980 AGRICULTURAL EMPLOYMENT**

| Area | Number | Percent Distribution |
|---|---|---|
| ARKANSAS | 59,212 | 100.0 |
| East | 13,253 | 22.4 |
| Northwest | 8,621 | 14.6 |
| Southeast | 7,606 | 12.8 |
| Southwest | 6,684 | 11.3 |
| Central | 6,446 | 10.9 |
| White River | 6,215 | 10.5 |
| West Central | 5,710 | 9.6 |
| Western | 4,677 | 7.9 |

Agricultural employment as a share of total employment ranged from 1 percent in Pulaski County to 27 percent in Prairie County and exceeded the State average in 50 of the 75 counties.

Figure 15 depicts by county the percent of Arkansas' civilian labor force unemployed in 1980. Three districts and 31 counties had unemployment rates below the State average of 6.9 percent. These districts and their unemployment rates were Central, 5.4 percent; Northwest, 5.9 percent; and Southwest, 6.5 percent.

## Employed Persons by Occupational Division

Table 25 shows that of Arkansas' 1980 civilian employment total of 875,733: 43.9 percent (384,084) were white collar workers; 37.8 percent (330,855) were blue collar workers; 6.1 percent (53,363) were farm workers; and 12.3 percent (107,431) were service workers.[9] Corresponding shares for the Nation were 53.0 percent, white collar; 31.2 percent, blue collar; 2.9 percent, farm; and 12.9 percent, service workers.

The proportion represented by white collar worker employment ranged from 37.0 percent in the White River District to 54.6 percent in the Central District. The Central District accounted for 30.4 percent (116,807) of all the State's white collar workers. White collar employment shares ranged from 25.8 percent in Madison County to 59.7 percent in Pulaski County.

Blue collar worker proportions ranged from 31.1 percent of total employment in the Central District to 42.6 percent in the Southeast. The Central and East Districts accounted for 36.9 percent of all the State's blue collar workers. For the counties, the range was from 27.8 percent blue collar workers in Pulaski County to 53.3 percent in Randolph County.

Farm worker shares ranged from 2.4 percent of the total employment in the Central District to 9.0 percent in the White River District. The East, Northwest, and Southeast Districts accounted for 52 percent of the State's total farm workers. Among the counties, the range was from 0.7 percent in Pulaski County to 25.1 percent in Prairie County.

Service workers include persons working in the following categories: cleaning service, food service, health service, personal service, protective service, and private household jobs. Service worker proportions ranged from 11.4 percent of the total employment in the Western District to 14.2 percent in the West Central District. For the counties, the range was from 7.1 percent in Randolph County to 17.8 percent in Garland County.

## Employment by Class of Worker

Table 26 shows the relative distribution of persons employed in Arkansas by class of worker. Of the 1980 employment total of 875,733: 72.4 percent were private wage and salary workers, compared to 75.6 percent for the Nation; 17 percent of the State's employed worked for the federal, State or local governments, compared to a national figure of 17.2 percent; 9.9 percent in the State and 6.8 percent in the Nation were classified as self-employed; and the remaining 0.6 percent in the State and 0.5 percent in the Nation represented unpaid family workers.

## Employment in Health-Related Occupations

Table 27 indicates that in Arkansas there were 19.2 health workers per 1,000 population in 1980, compared to a 22.9 national level. This indicator varied from 15.0 in the East to 28.3 in the Central District. In the counties, the number of persons classified as health workers ranged from 7.2 per 1,000 population in Poinsett and Prairie counties to 31.8 per 1,000 population in Pulaski County.

In 1980, Arkansas had 1.9 physicians, dentists and related practitioners; 6.7 health workers other than practitioners; and 10.7 health service workers per 1,000 population.[10] Comparable figures for the U.S. were 2.9, 10.1, and 10.0, respectively.

Table 28 provides a 1981 count of the health manpower in Arkansas by professional classification. There were 802 persons per physician and 224 persons per registered nurse in the State. Persons per physician ranged from 405 in the Central District to 1,376 in the

White River District. (See Figure 16.) Persons per registered nurse ranged from 127 in the Central District to 373 in the Southeast.

## Number of Farm Operators

Tenant farm operators accounted for 11.0 percent of all Arkansas farm operators in 1978, compared to 12.6 percent of the total farm operators in 1969, and 24.3 percent in 1959.[11]

The 1978 farm tenancy percentage varied considerably among the districts, ranging from 3.6 percent in the Northwest to 24.6 percent in the East. For the counties, the percent farm tenancy varied from 1.2 percent in Calhoun County to 38.2 percent in Mississippi County. (See Table 29.)

## Place of Work and Means of Transportation

Table 30 indicates that of the 800,331 Arkansans who reported their place of work in 1980: 84.9 percent stated that they worked in their county of residence; 12.4 percent stated that they worked in their state of residence but outside their county of residence; and the remaining 2.7 percent reported that they worked outside their state of residence. (Note that 7.7 percent (67,044) of the State's total workers did not report their place of work to the Census.)

Of those who reported place of work, the percent working outside their county of residence ranged from 11.8 in the Northwest to 19.6 in the Southwest District. The State average was 15.1 percent. Among the counties, Pulaski had the lowest proportion of residents working outside the county (4 percent) and Cleveland County had the highest proportion (62.8 percent).

Table 31 shows means of transportation to work for Arkansas workers aged 16 and over in 1980. The data indicates that 91.3 percent of all workers drove to work either alone or in carpools; 0.8 percent used public transportation; 4.1 percent walked to work; 1.4 percent used other means of transport; and the remaining 2.4 percent worked at home.

# V. Income Status

## Income of Families by Selected Income Classes

In 1979, 41.8 percent of the Nation's families had incomes of $22,500 and above; by contrast only 25.7 percent of Arkansas' families were in this group. The lowest income interval reflected that 13.6 percent of the Nation's families had incomes of $7,500 or less in 1979, compared to 21.7 percent of Arkansas'.

Table 32 shows that within the State's districts, the percent of families with incomes of $7,500 or less ranged from 15.0 in the Central District to 20.2 in the Western District.

In 74 of the State's 75 counties, the proportion of families with incomes under $7,500 was larger than the national average of 13.6 percent. The exception was Saline County with 11.5 percent. In the remaining counties, the percent of families in this low income class ranged from 13.7 in Pulaski County to 42.6 in Lee County.

## Median Income

Arkansas' median family income in 1979 was $14,641, or 73.5 percent of the Nation's median family income figure of $19,917. In 1969, the State to Nation ratio was 65.4 percent.[12]

Arkansas' median income for unrelated individuals[13] was $4,428 in 1979 compared to $6,695 for the Nation, reflecting a State to Nation ratio of 66.1 percent. The State's 1979 median household income of $12,214 was 72.5 percent of the Nation's median household income of $16,841.

Median family income in 1979 ranged from $12,326 in the White River District to $17,826 in the Central District. Twenty-two of the State's 75 counties had median family incomes above the State average. These counties and their median incomes are listed below. (See Figure 19.)

| County | Median Family Income in 1979 | County | Median Family Income in 1979 |
|---|---|---|---|
| | (dollars) | | (dollars) |
| Saline | 19,526 | Union | 15,412 |
| Pulaski | 18,509 | Garland | 15,380 |
| Sebastian | 16,524 | Miller | 15,282 |
| Grant | 16,489 | Craighead | 15,243 |
| Faulkner | 16,367 | Hot Spring | 15,033 |
| Little River | 16,301 | Pope | 14,964 |
| Ashley | 16,119 | Clark | 14,955 |
| Jefferson | 15,833 | Crawford | 14,740 |
| Washington | 15,780 | Arkansas | 14,730 |
| Benton | 15,760 | Sevier | 14,729 |
| Lonoke | 15,704 | Howard | 14,664 |

## Household Income by Income Type

The following tabular insert compares the State and Nation in the percent of total households that received income from selected sources. County and district data for the State may be found in Table 34.

In both the State and the Nation the proportion of unrelated individuals in poverty was substantially greater than the proportion of families in poverty. Table 35 indicates that 39 percent (85,625) of the State's unrelated individuals had incomes below the poverty level, compared to 25.1 percent for the Nation.

| Income Type | Percent of Total Households* | |
|---|---|---|
| | Arkansas | United States |
| Earnings | 76.3 | 81.3 |
| Wage or salary income | 71.3 | 77.7 |
| Nonfarm self-employment income | 10.1 | 9.3 |
| Farm self-employment income | 6.1 | 3.3 |
| Interest, dividend, or net rent income | 29.8 | 41.4 |
| Social Security income | 32.4 | 25.9 |
| Public Assistance income | 10.5 | 8.0 |
| All other income | 23.7 | 23.8 |

*Percentages do not total 100.0 because households may be counted more than once.

The data indicates that the proportion of households receiving wage and salary income was lower for the State than for the Nation; but the proportion receiving income from self-employment (both farm and nonfarm) was higher for the State. Overall, the State had a lower proportion of households with income from earnings. The percent of households with interest, dividend or net rent income was considerably lower for the State than for the Nation, 29.8 and 41.4 percent, respectively. However, the State had higher proportions of households receiving Social Security and Public Assistance income.

## Poverty Status in 1979 of Families and Unrelated Individuals

Table 35 shows the poverty status of families and unrelated individuals categorized by the number and percent in poverty and their mean income deficits[14] in 1979.

The data reflects that 14.9 percent (93,572) of Arkansas' families had incomes below the poverty level, compared to the corresponding national level of 9.6 percent. In the districts, the percent of families with incomes below the poverty level ranged from 10.3 in the Central District to 20.5 in the East. For the counties, the range was from 7.5 percent in Saline County to 36.6 percent in Lee County.

In both the State and Nation, 50.5 percent of the families with 1979 incomes below the poverty level reported that the householder worked in that year. By contrast, only 25.1 percent of the State's and 39.6 percent of the Nation's unrelated individuals in poverty reported having worked in 1979.

## Poverty Status in 1979 by Presence and Age of Related Children in Families

Approximately one-half (53.3 percent) of Arkansas' 1980 family total of 628,006 consisted of families with one or more children under 18 years of age who were related to the head of the family. Of these 334,757 families, 60,466 or 18.1 percent had incomes in 1979 that were below the poverty level. For the Nation, the comparable proportion was 13.2 percent.

An age distribution of related children in the State's families whose income was below the poverty level shows that 17.9 percent (10,813) had children that were under five years of age only; 50.6 percent (30,575) had children in the five to 17 years of age group only; and the remaining 31.5 percent of the families (19,078) had children in both age groups. (See Table 36.)

Shown in the following tabular insert is a summation of the Planning and Development District data contained in Table 36. The tabular insert indicates that the 1980 relative distribution of the State's families, with related children whose 1979 incomes were below the poverty level, ranged from 24.9 percent in the East to 13.1 percent in the Central District. Districts other than the East whose relative poverty levels exceeded the State average of 18.1 percent were Southeast, 22.1 percent; Southwest, 19.6 percent; and White River, also 19.6 percent. Although the four districts contained only 47.0 percent of the State's families with related children, they contained 57.5 percent of the number whose income was below the poverty level.

## Poverty Status in 1979 of the Population 65 Years and Over in 1980

Table 37 shows that 26.7 percent (83,524) of the State's population aged 65 years and over in 1980 had incomes below the poverty level in 1979. The corresponding national figure was 14 percent. In the State's districts the percent of the 65 and over population in poverty ranged from 19.2 in the Northwest to 34.7 in the Southeast. For the counties the range was from 10.8 percent in Baxter County to 47.2 percent in Chicot County.

| | Percent Distribution | | |
|---|---|---|---|
| **District** | **All Families With Related Children** | **Families With Income Above Poverty Level** | **Families With Income Below Poverty Level** |
| Northwest | 100.0 | 85.6 | 14.4 |
| White River | 100.0 | 80.4 | 19.6 |
| East | 100.0 | 75.1 | 24.9 |
| Western | 100.0 | 83.6 | 16.4 |
| West Central | 100.0 | 84.3 | 15.7 |
| Central | 100.0 | 86.9 | 13.1 |
| Southeast | 100.0 | 77.9 | 22.1 |
| Southwest | 100.0 | 80.4 | 19.6 |
| STATE OF ARKANSAS | 100.0 | 81.9 | 18.1 |

# VI. Disability, Health Care Facilities, and Public Assistance

The data presented in this Section pertains to: (1) disability and employment status; (2) health care facilities, hospitals, infirmaries, and nursing homes; and (3) public assistance to families with dependent children, the disabled, blind, and aged (including medical assistance).

## Disability and Employment Status

The disability data contained in Table 38 indicates that 12.7 percent (175,688) of Arkansas' 1980 population 16-64 years of age was disabled or handicapped, compared to only 8.5 percent of the Nation's. Over two-thirds (67.5 percent) of the State's disabled did not participate in the labor force and over half (57.6 percent) of the disabled stated that their condition prevented them from working. Comparable national ratios were 61.9 and 51.2 percent, respectively. Disability rates ranged from 10.3 percent of the population 16-64 years of age in the Central District to 15.9 percent in the White River District. The range in the disability rate for the State's 75 counties was from a low of 9.7 percent in Pulaski County to a high of 22.3 percent in Searcy County.

## Health Facilities

Data pertaining to hospitals, infirmaries, nursing homes, and pharmacies is presented in Tables 39 and 40.

## Hospitals and Infirmaries

There were 108 non-federal, State-licensed hospitals and 11 infirmaries in the State in 1982. Seven of the hospitals were classified as specialized (psychiatric or rehabilitative) and the remaining 101 as general medical and surgical hospitals. The general hospital bed total was 11,418; specialized hospital total, 1,007; and the infirmary total, only 163 beds. Most of the infirmaries were located at State correctional facilities, human development centers, and on college campuses. The 1980 Census count used as the population base shows that there were 5.0 general hospital beds per thousand of the State's population. By district the range in bed availability per thousand population was from 3.3 in the Southeast to 6.8 in the Western District.

In addition to the State licensed hospitals there were three federal Veterans Administration hospital facilities in the State in 1982. The facilities were located at Little Rock, North Little Rock, and Fayetteville. The total bed count for the three hospitals was 1,715, with the combined Little Rock and North Little Rock units accounting for 1,516 (88.4 percent) and Fayetteville for 199 beds (11.6 percent). Nursing home beds accounted for 200 of the Little Rock-North Little Rock total.

## Nursing Homes and Beds by Type of Care

The nursing home data contained in Table 40 indicates that there were 225 nursing homes in the State in 1982. These homes contained a total of 22,331 beds of which 10,777 (48.3 percent) were classified as skilled care beds, 10,087 (45.2 percent) as intermediate care beds, and 1,473 (6.6 percent) as intermediate care beds for the mentally retarded.

The 1980 population census used as an estimate of Arkansas' 1982 population indicates that in 1982 there were 66.8 beds per thousand persons aged 65 years and over. For the districts, the number of beds per thousand population in this age group ranged from 53.4 in the Northwest to 86.7 in the Central District.

National Health Survey statistics for 1980 show that the number of beds in nursing and related care homes per thousand population 65 years of age and over was 61.6 beds for the State and 57.2 for the Nation. This survey included only those facilities having 25 or more beds.

## Public Assistance

Tables 41-43 show the number of Arkansans participating in public assistance programs relating to Aid to Families with Dependent Children (AFDC), Aid to the Aged (AA), Aid to the Blind (AB), Aid to the Disabled (AD), and Medicaid Assistance to persons 65 years of age and over.[15]

There were 31,150 families representing 28,170 adult and 66,102 child participants in the State's Aid to Families with Dependent Children (AFDC) program during the Fiscal Year 1982-1983. The State average of 3.02 persons per AFDC family compares favorably with the State's 1980 Census count of 3.21 persons per family.

The number of AFDC cases by Planning and Development District is shown in the following insert table. Three Districts, the East, Southeast, and Southwest, accounted for 58.0 percent of the Fiscal Year 1982-1983 AFDC cases but for only 37.5 percent of the State's 1980 family count.

| District | AFDC Families<br>Number | <br>Percent Distribution |
|---|---|---|
| Northwest | 1,709 | 5.5 |
| White River | 2,108 | 6.8 |
| East | 8,659 | 27.8 |
| Western | 1,695 | 5.4 |
| West Central | 2,067 | 6.6 |
| Central | 5,503 | 17.7 |
| Southeast | 5,370 | 17.2 |
| Southwest | 4,039 | 13.0 |
| STATE OF ARKANSAS | 31,150 | 100.0 |

The December 1983 relative distribution, by Planning and Development District, of State participants in the Aid to the Aged (AA), Aid to the Blind (AB), and Aid to the Disabled (AD) programs is presented in the following tabular insert.

| District | Percent Distribution<br>AA | <br>AD | <br>AB |
|---|---|---|---|
| Northwest | 7.7 | 7.5 | 7.2 |
| White River | 11.6 | 9.5 | 7.0 |
| East | 26.5 | 25.4 | 22.5 |
| Western | 5.3 | 6.4 | 5.7 |
| West Central | 9.7 | 10.2 | 8.8 |
| Central | 11.7 | 16.3 | 25.1 |
| Southeast | 14.4 | 12.8 | 12.8 |
| Southwest | 13.0 | 11.8 | 11.0 |
| STATE OF ARKANSAS | 100.0 | 100.0 | 100.0 |

Table 43 shows the number of State Medicaid eligibles for the Fiscal Year 1980-1981. These Medicaid eligibles totaled 62,674 and represented 20.1 percent of Arkansas' population 65 years of age and over. In four districts, the proportion of Medicaid eligibles in the population aged 65 years and over exceeded the State average. These districts were the East (30.4 percent); Southeast (25.6 percent); White River (21.9 percent); and Southwest (21.8 percent). In fact these four districts accounted for 61.6 percent of the State's Medicaid eligibles but for only 48.6 percent of its population 65 years of age and over.

# VII. Housing Characteristics

## Year-Round Housing Units by Type of Structure

Single unit houses accounted for 71.1 percent of the Nation's 1980 housing inventory, structures with two or more units for 23.9 percent, and mobile homes for 5.0 percent.[16]

The relative distribution for Arkansas was considerably different from that of the Nation. Of the State's 888,740 year-round housing units, 81.5 percent (724,629) were single unit houses, 10.7 percent (94,837) were multi-unit structures, and 7.8 percent (69,274) were mobile homes. District and county housing data is shown in Tables 44 and 45.

## Total Occupied Housing Units

Table 47 shows that 70.5 percent of Arkansas' occupied housing units were owner-occupied, compared to 64.4 percent for the Nation; conversely, renter occupancy accounted for 29.5 percent of occupied-housing units in Arkansas, and 35.6 percent in the Nation. The percent of owner-occupied units ranged from 64.2 in the East District to 76.5 in the White River District. Among the counties, the percent of renter-occupied units ranged from 15.3 percent in Baxter County to 46.7 percent in Phillips County.

The median value of owner-occupied units in Arkansas was $31,100 in 1980, compared to $47,200 for the Nation. A considerable difference in value was also evident in the median contract rent figures, which were $129 for Arkansas and $198 for the Nation. Within the State, the median values of owner-occupied units ranged from $15,900 in Lafayette County to $40,100 in Pulaski County; and the median contract rent varied from $60 in Lincoln County to $175 in Pulaski County.

## Plumbing Facilities and Persons Per Room

The data in Tables 48 and 49 indicates that 5.3 percent of Arkansas' 1980 year-round housing units lacked complete plumbing for exclusive use,[17] compared to 2.7 percent for the Nation. The range within the State's districts was from 2.1 percent in the Central District to 7.2 percent in the Southwest. The range for the counties was from 1.4 percent in Pulaski County to 28.4 percent in Newton County.

There were 1.01 or more persons per room in 5.2 percent of Arkansas' and 4.5 percent of the Nation's 1980 occupied housing units. In the State's districts, the proportions ranged from 4.2 percent in the Northwest to 7.1 percent in the East.

# VIII. Vital Statistics

## Crude Birth and Death Rates

Crude birth rates for 1980 in Arkansas and the Nation were essentially identical: 16.3 and 15.9 births, respectively per thousand population. Comparable 1970 rates for the State and Nation were 18.4 and 18.3, respectively.

As shown in Table 52, the range in the birth rates for the State's districts was from 13.5 births per thousand population in the West Central District to 18.1 in the East. In addition to the East, three other districts had birth rates which exceeded the State average; they were Central (17.9), Southeast (17.6), and Southwest (16.4).

The 1980 crude death rate for Arkansas, 9.9 deaths per thousand population, was greater than the Nation's 8.8 deaths per thousand population. By comparison, 1970 rates for the State and Nation were 10.7 and 9.5, respectively.

The district range in death rates (see Table 50) was from 8.4 deaths per thousand population in the Central to 11.5 deaths per thousand in the Southwest. Districts other than the Southwest experiencing death rates above the State average were White River (10.8), West Central (10.8), and East (10.2).

## Fertility Rate

The 1980 Arkansas fertility rate was somewhat higher than the Nation's: 74.2 births per thousand females 15-44 years of age compared to 68.4 births per thousand. Comparable 1970 rates for the State and Nation were 93.4 and 87.6, respectively. If the ratio of the State's fertility rate to that of the Nation is considered, this ratio was higher in 1980 than in 1970: 1.085 compared to 1.066.

The fertility rate range among the State's districts is significant, from 64.6 births per thousand females of childbearing age in the West Central to 82.6 births per thousand in the Southeast. Besides the Southeast, the two other districts with rates above the State average were the East (82.1) and Southwest (79.5).

## Infant Mortality Rate

The 1980 infant mortality rates for Arkansas and the Nation were in essence identical, 12.5 and 12.6 deaths per thousand live births, respectively.[18] This rate reflects a substantial decline from 1970 levels for both the State and Nation: the rates then were 20.6 and 19.8 deaths, respectively per thousand live births. The district range in this rate was from 8.4 in the White River to 14.5 in the East. Regarding county rates shown in Table 50, the user is cautioned to consider the adequacy of the number of infant deaths and births used in deriving these rates.

## Average Annual Birth Rate, Rate of Natural Increase, and Percent Net Migration

The average annual birth rates shown in Table 53 are based on an average of the annual number of births that occurred between the 10-year period of 1970-1980 divided by the mid-period population. The 1970-1980 average annual birth rate of 16.5 persons per thousand population varies insignificantly from the 1980 rate of 16.2 persons per thousand. However, the 10-year average annual rates do reflect that there is a substantial difference between the white and nonwhite populations, 15.0 and 23.5 births, respectively, per thousand population.

The rates of natural increase are also computed on a mid-decade population base.[19] The data shows that Arkansas' rate of natural increase during the 1970's was 6.3 percent, compared to a rate of 10.1 percent during the 1960's. Rates based on a color distribution of the population indicate that the 1970 to 1980 nonwhite natural increase rate of 12.5 percent was two and a half times greater than the rate for whites of 4.9 percent. Natural increase rates during the previous decade were 17.5 percent for nonwhites and 8.3 percent for whites. The 1970-1980 rate of natural increase ranged from a low of 2.8 percent in the West Central District to a high of 9.3 percent in the Central District. Districts other than Central whose natural increase rates exceeded the State average were the East (8.3 percent) and the Southeast (6.9 percent).

A review of the data for the individual counties shows that between 1970 and 1980, 24 or almost a third of Arkansas' 75 counties experienced natural increase rates that exceeded the State average; 43 counties (57.3 percent) experienced rates of increase below the State average; and eight counties (10.7 percent) actually sustained natural decreases (an excess of deaths over births).

The 24 counties whose rates of natural increase exceeded the State average accounted for almost 80 percent of the State's 1970-1980 natural increase of 131,758, but for only 30.5 percent of its estimated net inmigration of 231,376. The 1980 population of this group of counties was 1,279,146 and represented 55.9 percent of the Arkansas population count. This county-group's growth of 175,760 accounted for almost 50 percent (48.4) of the State's growth during the 1970's.

By contrast, the eight counties experiencing natural decreases (a multi-county natural decrease total of 1,163) accounted for one-fifth (20.9 percent) of the State's 1970-1980 net inmigration and for 13.0 percent of its growth during the decade, even though this county-group's population was only 7.5 percent of Arkansas' 1980 population count.

# NOTES

[1] The urban population is defined by the Census Bureau as "Generally, all persons residing in areas determined to be urbanized areas or in places of 2,500 or more outside urbanized areas. An urbanized area consists of a central city or cities, and surrounding closely settled territory."

[2] Population not classified as urban constitutes the rural population. (Refer to note one for the definition of urban population.) The rural nonfarm population is defined as those persons living in rural areas, but not on farms. The Census Bureau classifies the farm population as all persons living on places of one acre or more from which at least $1,000 of agricultural products were sold during 1979.

[3] Net migration is computed as the difference between the "actual population" and the "expected population" at the end of a specific time period. Expected population is the total of the population at the beginning of the time period and the amount of natural increase (excess of births over deaths) over the time period. A migration rate is computed by dividing the net migration total for a time interval by the mid-period population estimate.

[4] Inmates of other institutions were defined in the Census as those persons under care or custody in homes, schools, hospitals, or wards for juveniles, the physically handicapped or the mentally handicapped; homes or hospitals for tuberculosis, or other chronic disease patients; homes for unwed mothers; nursing, convalescent, and rest homes; orphanages and correctional institutions.

The "other group quarters" population is defined as persons residing in rooming and boarding houses, communes, farm and nonfarm workers' dormitories, convents or monasteries, military barracks, college dormitories (including fraternity or sorority houses); patients under short-term hospital care with no usual place of residence; group quarters staff; persons staying in flophouses, Salvation Army shelters, railroad stations and similar types of quarters; and other living arrangements that qualify under the group quarters classification.

[5] The Bureau of the Census defines the two types of households as follows: "A family head is a household head living with one or more persons related to him or her by blood, marriage, or adoption. A primary individual is a household head living alone or with nonrelatives only."

[6] The 1980 State household count (816,065) presented in Tables 16-18 differs slightly from the 1980 count (816,706) presented in Table 19 because the data in Tables 16-18 is based on answers to questions asked of the entire population and that in Table 19 on questions asked of a sample of the population.

[7] The Census Bureau defines own children as sons and daughters, including stepchildren and adopted children who are single (never married) and under 18 years of age.

[8] The dependency ratio is the number of dependents per 100 workers. The number of dependents is usually defined as all persons except those 21-64 years of age, who comprise the workers. In some instances both youth and old-age dependency ratios are computed. The youth ratio numerator is the population 0-20 years of age; and the old-age numerator, the population 65 years of age and over.

[9] White collar—Professional, technical, and kindred workers; managers and administrators, except farm; sales workers; and clerical and kindred workers. Blue collar—Craftsmen and kindred workers; operatives, except transport; transport equipment operatives; and laborers, except farm. Farm workers—Farmers and farm managers, farm laborers, and farm foremen. Service workers—Service workers including private household.

[10] For an identification of the occupational titles of the persons comprising the several health-related groups discussed in this section, refer to Table 27.

[11] Tenure is classified in the Census of Agriculture as follows: "(a.) Full owners, who operate only land they own; (b.) Part owners, who operate land they own and also land they rent from others; and (c.) Tenants, who operate only land they rent from others, or work on shares for others."

[12] The median income is the amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median.

[13] In the Census, "an unrelated individual is (1) a householder living alone or with nonrelatives only, (2) a household member who is not related to the householder, or (3) a person living in group quarters who is not an inmate of an institution." Income statistics include only those unrelated individuals 15 years of age and over.

[14] The mean income deficit is an estimate of the amount of money required to raise the income of poor families and unrelated individuals to their respective poverty thresholds. The 1979 weighted average thresholds at the poverty level were $3,686 for unrelated individuals and $7,412 for a family of four. Other poverty thresholds based on age of householder and number of persons in family cross-classified by related children under 18 years of age and a general explanation of the poverty concept is available in the Bureau of Census **1980 Census of Population** publication entitled, *General Social and Economic Characteristics, Arkansas, PC80-1-C5*, Appendix B, pp. 22 and 23, U.S. Government Printing Office, Washington, D.C., July 1983.

[15] Medicaid is a Federal program providing medical assistance to certain low income individuals and families. The program (Title XIX of the Social Security Act) became Federal Law in 1965.

[16] Housing units refers to year-round units only. These units are defined as "all occupied units plus vacant units which are intended for year-round use . . .. Vacant mobile homes are included, provided they are intended for occupancy on the site where they stand."

[17] The category "complete plumbing for exclusive use" consists of units which have hot and cold piped water, a flush toilet, and a bathtub or shower inside the housing unit for the exclusive use of the occupants of the unit.

[18] An infant mortality rate is defined as the number of infant deaths during a year per thousand live births during the same year. Infants are defined as those persons in the first year of life.

[19] Natural increase is defined as the excess of births over deaths for a given population over a specific time period.

TABLE 6

PROVISIONAL ESTIMATES . . . BY COUNTY: 1970 AND 1980 – Continued

| County | 1980 Population[1] | 1970 Population[1] | Births | Deaths | Natural Increase | Net Migration[2] Number | Net Migration[2] Percent[3] |
|---|---|---|---|---|---|---|---|
| STATE (added) | 2,286,435 | 1,923,295 | 347,725 | 215,967 | 131,758 | 231,382 | 11.0 |
| White | 1,919,432 | 1,582,252 | 263,230 | 176,594 | 86,636 | 250,544 | 14.3 |
| Nonwhite | 367,003 | 341,043 | 84,495 | 39,373 | 45,122 | -19,162 | -5.4 |
| STATE (worked) | 2,286,435 | 1,923,295 | 347,712 | 215,948 | 131,764 | 231,376 | 11.0 |
| White | 1,890,322 | 1,565,915 | 259,343 | 174,687 | 84,656 | 239,751 | 13.9 |
| Nonwhite | 396,113 | 357,380 | 88,369 | 41,261 | 47,108 | -8,375 | -2.2 |

[1] The sum of the county numbers by race will not equal the worked total shown for the state because white and nonwhite data are shown separately only for those counties in which the 1970 nonwhite population accounted for 10 percent or more of the total or numbered 10,000 or more. Furthermore, the race counts shown in this report are provisional. Final race counts will be determined after the sample data has been processed.

[2] The net migration estimates shown above may be overstated between 1 and 2 percent of the 1980 Arkansas count since the Bureau of the Census believes that this is the most accurate census count in the nation's history. Even if this is true, the net inmigration would still be most impressive.

[3] Per 100 midperiod population.

Source: Prepared by the Industrial Research and Extension Center, University of Arkansas, Little Rock, from U.S. Department of Commerce, Bureau of the Census, *1970 Census of Population, Arkansas*, Vol. 1, Part 5, February 1973, and unpublished data from 1980 Census Summary Tape File 1B, released December 1981, and from resident birth and death statistics obtained from the Arkansas State Department of Health.

March 1982

---

**[1] The sum of the county numbers by race will not equal the worked total shown for the state because white and nonwhite data are snown separately only for those counties in which the 1970 nonwhite population accounted for 10 percent or more of the total or numbered 10,000 or more. Furthermore, the race counts shown in this report are provisional. Final race counts will be determined after the sample data has been processed.**

**[2] The net migration estimates shown above may be overstated between 1 and 2 percent of the 1980 Arkansas count since the Bureau of the Census believes that this is the most accurate census count in the nation's history. Even if this is true, the net inmigration would still be most impressive.**

**[3] Per 100 midperiod population.**

**Source: Prepared by the Industrial Research and Extension Center, University of Arkansas, Little Rock, from U.S. Department of Commerce, Bureau of the Census, *1970 Census of Population, Arkansas,* Vol. 1, Part 5, February 1973, and unpublished data from 1980 Census Summary Tape File 1B, released December 1981, and from resident birth and death statistics obtained from the Arkansas State Department of Health.**

[a] The current definition of a farm is any place from which $1,000 or more of agricultural products were sold or normally have been sold during the census year. The previous definition (used for the 1959, 1964 and 1969 censuses, and for the 1974 preliminary county reports) counted as a farm any place with less than 10 acres from which $250 or more of agricultural products were sold or normally would have been sold during the census year, or any place of 10 acres or more from which $50 or more of agricultural products were sold or normally would have been sold during the census year. State totals for 1978 are not directly comparable with totals for 1974 or earlier censuses as they include data for farm operations represented on the mail list plus estimates from the direct enumeration sample for farms not represented on the mail list. In 1978, there were 7,015 farm operators, of which 660 (9.4 percent) were tenant farm operators, from farms not on mail list.

---

[1] Average number receiving Medicaid during fiscal year 1980-1981. Medicaid is a Federal program providing medical assistance to certain low income individuals and families. The program (Title XIX of the Social Security Act) became Federal Law in 1965.

[2] Nursing care cases with no money grant.

## TABLE 53

## AVERAGE ANNUAL BIRTH RATE . . . BY PDD: 1970 TO 1980 – Continued

| Region | Average Annual Births | Average Annual Birth Rate | 1970-1980 Rate of Natural Increase | 1970-1980 Net Migration |
|---|---|---|---|---|
| Southwest EDD of Arkansas, Inc. – (cont'd.) | | | | |
| Lafayette | 167 | 16.5 | 3.9 | -2.0 |
| White | 73 | 12.5 | -0.7 | 6.1 |
| Nonwhite | 94 | 21.9 | 10.1 | -12.9 |
| Little River | 219 | 17.4 | 7.9 | 14.1 |
| White | 138 | 14.9 | 5.5 | 18.9 |
| Nonwhite | 81 | 24.3 | 14.5 | 0.7 |
| Miller | 632 | 17.8 | 7.2 | 5.2 |
| White | 435 | 16.1 | 5.8 | 3.8 |
| Nonwhite | 197 | 23.0 | 11.5 | 9.4 |
| Nevada | 170 | 16.0 | 1.6 | 7.7 |
| White | 98 | 13.5 | -1.7 | 13.4 |
| Nonwhite | 72 | 21.4 | 8.9 | -4.6 |
| Ouachita | 485 | 15.8 | 4.1 | -5.2 |
| White | 253 | 12.9 | 1.3 | -2.8 |
| Nonwhite | 232 | 20.9 | 8.9 | -9.4 |
| Sevier | 195 | 15.4 | 3.4 | 18.6 |
| Union | 736 | 15.7 | 3.9 | 2.8 |
| White | 431 | 13.0 | 1.4 | 5.8 |
| Nonwhite | 305 | 22.1 | 9.8 | -4.2 |

[a] The sum of the county numbers by race will not equal the total shown for the state because white and nonwhite data are shown separately only for those counties in which the 1970 nonwhite population accounted for 10 percent or more of the total or numbered 10,000 or more.
